Art Unit: 1724

A cursory review of the claims indicated that claim 4 depends from cancelled claim 3. No objection or rejection is made at this time insofar as examination on the merits has not yet begun. Applicant is encouraged to review claims 3 and 4 and take whatever permissible action he deems appropriate.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 2, 4, 6 - 12, drawn to a method, classified in class 210, subclass 758.
- II. Claims 13-15, drawn to an installation, classified in class 210, subclass 150.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and because the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 1724

A telephone call was made to Kenneth Fagin on 9/29/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chester T. Barry whose telephone number is 703-306-5921. The examiner can normally be reached on M - F 9 - 3:30 PM.
